

# TURFED DECKING

[www.finsa.es](http://www.finsa.es)

## DESCRIPTION

Turfed Decking with tanalised timber support frame.

## CHARACTERISTICS

FINSA Turfed Decking gives a sense of real grass for balconies, terraces, pool / sports areas, exhibition displays and playgrounds.

It provides natural compliments of green without the need to mow, water or provide sunlight; saving both electricity and water.

FINSA Turfed Decking can be easily and quickly installed due to its timber support frame. It can also be easily stored.

## ADVANTAGES

The turf textile and timber support frame allow for effective drainage. The support frames are made from Pinaster Pine, and tanalised to humidity risk level 3; suitable for exterior use)

Due to the absence of arsenic and chrome, the Berthell treatment procedure used is recognised by EU Health & Safety Authorities.

## APPLICATIONS

Balconies, terraces, pool / sports areas, exhibition displays, playgrounds...
