

WALKWAY DECKING

www.finsa.es

DESCRIPTION

Specialised timber decking for walkways

CHARACTERISTICS

Elevated base frame of tanalised pinaster pine

Available in green and brown

Available with fine brush or anti-slip finish, assembled with either nails or screws, upon request.

Tanalised up to level 4 humidity tolerance (exterior)

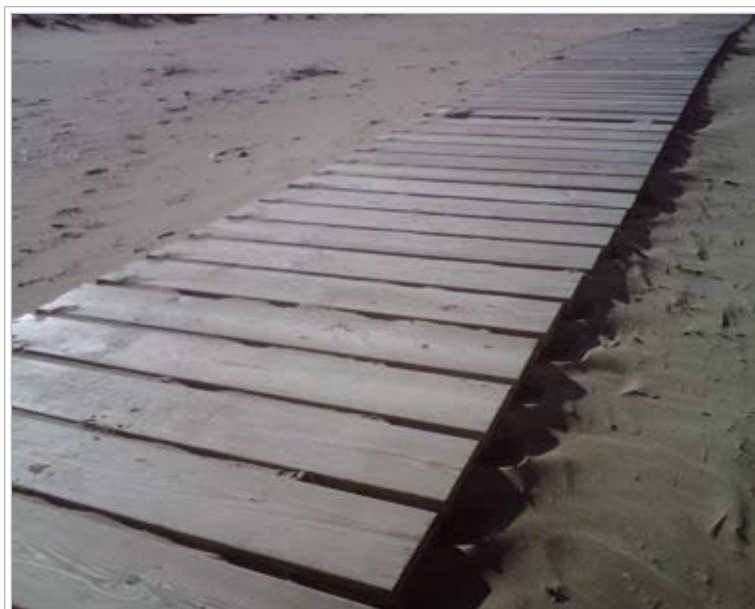

Due to the absence of arsenic and chrome, the Berthell treatment procedure used is recognised by EU Health & Safety Authorities.

APPLICATIONS

FINSA walkway decking is designed for use on all surfaces; beaches, showers, leisure areas...

STANDARD FORMATS (mm)

- 1200 x 1150 x 80mm: Tiles with 3 base strips, level 4 tanalisation, with rounded edges grade 5.
- 1200 x 1150 x 95mm: Tiles with 3 base strips, level 4 tanalisation, with rounded edges grade 12.
